

Tiny Track

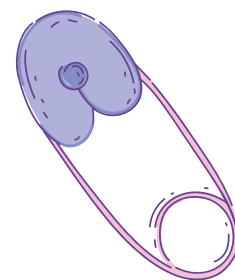

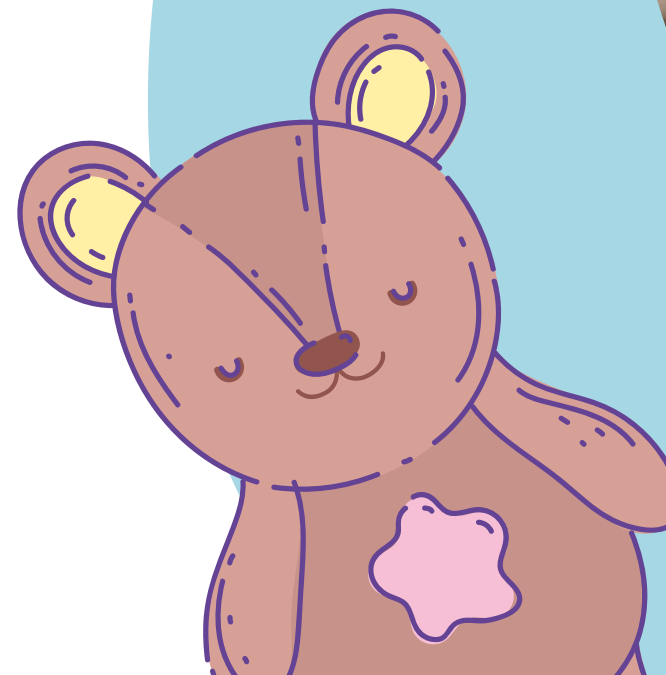

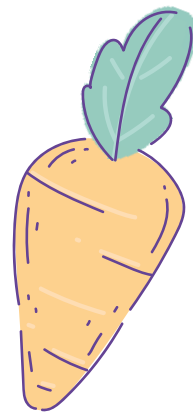

Smart care for little lives.

Introduction

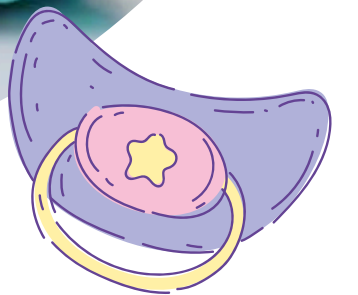

Tiny Track is a smart, portable gadget that attaches to baby diapers to monitor body temperature, urination, and movement in real time. Using IoT technology, it alerts parents instantly—bringing peace of mind and improving infant care at home or on the go.

Our Features

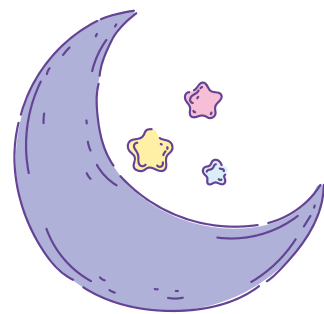

- **Real-Time Alerts** - Know immediately when your baby needs attention
- **Temperature Monitoring** - Detects any rise in body heat
- **Urine Detection** - Alerts when the diaper is wet
- **Motion Tracking** - Notifies if baby moves or leaves the crib
- **Safety Zone Warning** - Prevents danger by alerting when baby approaches restricted areas
- **Wireless Charging** - No battery replacements needed
- **Customizable** - Programmable for babies with special health needs

Our Product Advantage

- Designed for infants under 3 months—when health monitoring is most critical
- Washable, soft, and baby-safe materials
- Powered by IoT with a flexible, skin-friendly PCB
- Connects to your smartphone for instant, personalized updates
- Complies with all child safety and data privacy regulations in Canada
- Competitive edge: combines all essential baby monitoring features in one sleek device
